PROFESSIONAL PROFILE

Fullstack Developer specialized in C#, ASP.NET Core, React, and TypeScript, with experience in enterprise web systems and native mobile applications in Kotlin. I design solutions with clean and scalable architecture (Vertical Slice, CQRS, Clean Architecture, and SOLID principles), secure REST APIs with JWT authentication, and applications with offline support. I care about maintainable code, documentation, and user experience. I have deployed my own projects to production with Cloudflare and GitHub Actions.

EXPERIENCE

Fullstack Developer (Professional Internship)

LiveFree Emergency Response 10/2025 - 04/2026 Remote

- Developed an end-to-end module for an enterprise emergency response web system. It included React interfaces, REST APIs with ASP.NET Core, and database modeling in SQL Server with Entity Framework Core.
- Implemented local storage with offline support so the system could continue operating during connectivity interruptions.

Mobile Developer (Professional Internship)

SITelecom 05/2022 - 08/2022 Tula de Allende, Hidalgo, México

- Developed a native Android application in Kotlin to manage and track field technician crews in real time.
- Implemented GPS route tracking modules, travel expense control with photographic evidence, and on-site incident reporting.
- Participated in the development of the web admin panel in React to assign locations and travel expenses and monitor operational reports.

FEATURED PROJECTS

FacilityOS — Educational Facility Management Platform

github.com/OrlandoGalvanVargas/facilityos

- Built a .NET 10 API with Vertical Slice Architecture, CQRS (MediatR), JWT authentication with refresh tokens in httpOnly cookies, and a multi-tenant architecture by district and school.
- Developed the frontend in React 19, TypeScript, Vite, Ant Design, TanStack Query, and Zustand, with an offline cache in IndexedDB and a demo mode with MSW. Deployed it on Cloudflare Pages.

DarmixPet — Android Time Control App

github.com/OrlandoGalvanVargas/DarmixPet

- Developed an app in Kotlin with a floating pet (overlay) that monitors and blocks apps during configurable sessions. Used Foreground Service, AccessibilityService, WindowManager, WorkManager, and Room.
- Designed an extensible skin system using the Registry pattern and distributed it as an APK through GitHub Releases.

SKILLS

Backend

C# .NET ASP.NET Core Entity Framework Core REST APIs Java Node.js JWT Laravel

Frontend

React TypeScript JavaScript HTML5 CSS3 Tailwind CSS Vite Ant Design Astro

Databases

SQL Server PostgreSQL MySQL MongoDB Redis SQLite

DevOps & Tools

Git CI/CD Docker Nginx

LANGUAGES

Spanish — Native

English — Intermediate

EDUCATION

Software Development and Management Engineering

Universidad Tecnológica Tula-Tepeji

09/2024 - 05/2026 Hidalgo, México
